

At Quality Chemicals, we simplify the business for nutrition. With over 90 years of experience, we're European leaders in manufacturing high-purity mineral salts, (bulk and trace elements) ensuring top quality and compliance, for nutritional supplements, for infant food, for beverage, for milk and dairy products, for medical nutrition, for general food, for woman's health.

| Mastering Industry We bring deep knowledge and tailored solutions to each section sect | | | |
|--|--|--|--|
| Our Evolution and Expansion | Our state-of-the-art facilities and flexible manufacturing capabilities allow us to customize products to meet specifications, aligned with regulatory requirements. | | |
| Unyielding Quality Unit | Quality is the bedrock of our commitment at Quality Chemicals; we are not just the stewards of quality but also the architects of trust. | | |
| End-to-End Comprehensive Services | Our aim revolves around simplifying raw material purchasing from initial development to final delivery. | | |
| Global Reach and Seamless Distribution | We take immense pride in our extensive global reach, rooted in a network of approvals, registrations, and strategically located facilities that contribute to ease distribution and delivery to clients worldwide. | | |
| Building Lasting Partnerships | Our focus extends far beyond delivering products; it centers on nurturing enduring partnerships. | | |

While our expertise spans various industries, our true passion lies in pharmaceuticals and biopharma. Thanks to our 2 state-of-the-art facilities strategically located in Europe, we have the capability to develop products tailored precisely to your specifications and quantity requirements while ensuring full compliance.

Nutraceuticals, also known as functional foods, refer to dietary supplements or food supplements containing substances derived from or integrated into foods that offer significant health benefits. These products encompass a broad spectrum of nutritional elements, including but not limited to vitamins, minerals, and other bioactive compounds.

In the realm of nutraceuticals, our focus is on providing essential nutrients critical for overall well-being, such as Magnesium, Calcium, Iron, Zinc, and trace elements like Selenium, Copper, Manganese, Chromium . These are fundamental elements required to maintain optimal health and function. However, it is important to note that the body's ability to absorb these nutrients can vary.

For instance, magnesium absorption typically ranges from 20% to 50% of the ingested amount, creating a demand for more bioavailable sources to maximize uptake. Our product, Magnesium Citrate (product code 1260), serves as a superior alternative, as it offers enhanced bioavailability compared to less costly options like oxides and carbonates.

To maintain the quality and safety of nutraceutical products, Directive (EC) No 2002/46 plays a vital role as the regulation governing food supplements. This directive sets the standards and guidelines for ensuring that these products are safe for consumption and meet necessary quality standards.

Furthermore, authorized health claims on food labels are crucial in the nutraceutical industry. These claims are granted to food supplements when scientific evidence supports their potential to reduce the risk of specific diseases. They serve as a valuable tool for consumers, offering transparency and guidance in choosing products that align with their health goals.

The European Food Safety Authority (EFSA) is responsible for evaluating such claims. Regulation (EU) No. 1924/20065 will fix the requirements for health claims in detail. Regulation (EC) No. 1881/2006 fix the maximum values for contaminants like heavy metals, like 3 mg/kg for lead, 1 mg/kg for cadmium, and 0.1 mg/kg for mercury. Our Mineral Salts for use in nutritional supplements comply with these requirements even as a raw material.

Regulatory Approvals and Certifications

Meeting the most stringent quality and regulatory standards has earned us approvals and registrations from renowned health authorities and certification bodies.

These approvals and certifications stand as a testament to our dedication to quality, compliance, and the highest standards of product integrity. We do not merely seek to meet industry standards; we aim to exceed them.

| Private Label Excellence | Operational efficiency unlocked with 70+ years of expertise. Tailored private label solutions for cost savings, strategic outsourcing, and quick time to market. |
|--------------------------------------|---|
| Precision Particle Size Solutions | Mastering particle size distribution for industries. Utilizing advanced methods for accuracy in crystal size. Customized solutions through milling or size reduction. |
| CDMO Mastery | Cutting-edge Contract Development & Manufacturing expertise. State-of-the-art facilities in Spain, offering scalability, outsourcing efficiency, and regulatory assurance. |
| Micronisation expertise | Cutting-edge micronisation for pharmaceuticals, food, cosmetics, oral care, and nutraceuticals. ISO and GMP certified, offering tailored particle size reduction and stringent quality assurance. |
| Scalability | From kilo.lab to large scale production, we have the capacity to match your demand, ensuring growth for your projects. |
| In-House-Lab | Our in-house laboratory facilities provide quick and reliable analysis, ensuring the highest quality control standards. |
| Customization | Our products are crafted to your specifications, ensuring they align perfectly with your project requirements. We excel in providing tailored solutions that precisely match your unique needs and goals. |

Quality Chemicals Range of elements

We offer the following elements through our salts which make the contribution to our health set out below:

| CODE | Description | CAS no. | FCC | EU Food Grade | Food Additive number |
|--------------|---|-------------------------|-----|------------------|----------------------|
