

Food

Using premium quality additives is very important in this market. Food is the first level of impact on nutrition.

Our commitment to adapting to the industry's needs means we are very exacting in the way we make these products and meticulous in their traceability and compliance with health regulations. Our experience in synthesising and manufacturing high quality salts enables us to meet customer needs and European and American standards.

Our HACCP (Hazard Analysis and Critical Control Points) risk analysis sets us apart and guarantees this product range. Our products are guaranteed for food use in compliance with all applicable standards and deliver AL (Food Additive) and FCC (Food Chemical Codex) grades.

In terms of regulations we are an authorised food additive manufacturer in the RSIPAC (Catalan Food Industry and Product Health Registry).

Working in close partnership with our customers to deliver the best solutions for their requirements is essential. This strategy means we can meet their food industry product needs in the most efficient way and at unbeatable prices.

In food we largely target the following sectors:

- Nutraceuticals
- Dietary supplements
- Dairy industry
- Brewery industry
- Meat industry
