

GMP conditioned

For years **Quality Chemicals S.L.** has supplied products to the pharmaceutical industry featuring guaranteed compliance with pharmacopoeia monographs. Using our experience and following regulatory changes in the pharmaceutical sector, we are proud to offer a wide range of products manufactured under GMP conditions.

These products are supplied under the **Farmaqemical** brand.

These products ensure both quality and the necessary documentation. We comply with the requirements of the most complex API and excipient regulations.

We can repackage raw materials in GMP conditions.

With the guarantee of our GMP certification and our experience in these types of processes, we can provide the documentation needed to comply with regulations and product protection.

We have passed API inspection by the health authorities (Spanish Agency of Medicines) and customers audits.

Since nowadays almost all products used in the pharmaceutical industry need to meet GMP requirements, our range for this sector has several GMP compliance levels for the products we supply:

Products repackaged in GMP conditions

- Products are packaged in an authorised cleanroom.
- Their manufacturing traceability is guaranteed.
- The product can be supplied in compliance with the quality standards of individual pharmacopoeias or a combination of several of them.
- A technical package with the product's documents required by regulations could be supplied based on the "Guideline Module 3 CTD Format".

Purity Chemicals facilities in Venta de Baños is authorised to repackaged products according to GMP standards and our authorised equipment includes the following:
packaging room.

The repackaging operation is sited in a cleanroom.
