

**PACKAGING SPECIFICATION**
**65 - ALUMINIUM DRUM 5 L**
**Description**

ALUMINIUM DRUM 5 L

**Dimensions (mm)**

Body Diameter: 175 mm + 0 -1  
Diameter inside the neck: 46 + 0.2 -0.3 mm  
Thread Diameter: 62DIN  
Height guarantee: 23.5 ± 0.5 mm  
Height on the neck of the joint plane: 297 ± 1 mm

**Material**

Material: Aluminum 1050A (Al.99,5)  
Injected sleeve: Polypropylene copolymer  
Injected Handle: Polyamide  
Standard color: White

**ADR/IMDG/IATA**

UN 1B1 / X1,2 / 250 / \*\* / F

**The product is  
produced in  
conformity to**

Aluminium 1050A and 1070A comply with European standard EN 602

EEC recommendation -Guidelines on metal and alloys for use in contact with foodstuff-  
Council of Europe February 13 2002. According to this recommendation, acidic and salty food should not be durably packed in direct contact with Aluminium.

**USA**

Food and Drug Administration (FDA) has historically issued favourable opinions for unalloyed Aluminium metals in contact with food (assuming insignificant migration to food). See Appendix 2, the letter of the FDA on October 11th 2011.

**Plastics**

Plastic content: 0,0 Kgs  
Recycled plastic: 0,0 Kgs
